

SAI RAJ

Noida, India — +91 88877 49394 — sairajpandiya@gmail.com — linkedin.com/in/sairaj05

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Developer with over 2 years of hands-on experience designing, building, and deploying scalable web applications using React.js, Next.js, Node.js, and .NET. Adept at engineering centralized corporate dashboards, optimizing complex workflows, and integrating real-time telemetry tracking. Demonstrated track record of improving data transparency, streamlining internal operations, and automating continuous delivery pipelines in production environments.

PROFESSIONAL EXPERIENCE

Senior Software Executive

June 2026 – Present

Onremote Telecom, Noida

- Architected a comprehensive Work Report Dashboard providing 100% data transparency for daily, weekly, and monthly employee productivity tracking across the organization.
- Engineered core Customer Relationship Management (CRM) enterprise modules to optimize operational workflow and client data management.
- Designed and integrated automated field employee tracking systems to optimize asset tracking and resource management.
- Developed a centralized Customer Ticket Control interface for the Network Operations Center (NOC) team, reducing resolution response times.
- Built an enterprise-grade Inventory Dashboard to monitor, audit, and manage physical hardware infrastructure resources.

Software Developer

May 2025 – May 2026

Dizon Technologies, Noida

- Developed and maintained master dashboards for Acer systems, enabling real-time monitoring and analytics.
- Designed and implemented scalable web forms for daily operational data updates across Lenovo systems.
- Built secure, optimized REST APIs using .NET and SQL Server for enterprise-level application workflows.
- Improved system performance and data processing efficiency through targeted backend optimization.
- Collaborated closely with cross-functional technical teams to deliver scalable, production-ready features.

Full Stack Developer

Nov 2023 – Nov 2024

Onremote Telecom, Noida

- Developed a responsive internal web platform for automated operational workflows and tracking metrics.
- Built and deployed official company website with modern, responsive UI using React.js and Bootstrap.
- Designed and integrated external APIs with frontend interfaces ensuring reliable, real-time data flow.
- Optimized application performance and minimized application bugs through structured testing and debugging.

Web Developer

Jun 2023 – Nov 2023

UNOS, Noida

- Developed and deployed two responsive corporate websites with improved performance and core accessibility standards.
- Ensured comprehensive cross-browser compatibility and optimized client-side asset loading speeds.

TECHNICAL SKILLS

Programming Languages: JavaScript, C#, SQL, Python

Frontend Frameworks: React.js, Next.js, Angular, HTML5, CSS3, Bootstrap

Backend Development: Node.js, .NET, REST APIs, JWT Authentication, RBAC

DevOps & Deployment: CI/CD Pipelines, AWS, Linux (Ubuntu), Nginx, PM2, Docker

Tools & Methodologies: Git, Postman, Power BI, System Design, Performance Optimization

PROJECTS

Remote Plant Monitoring System (IoT)

- Developed an end-to-end IoT system for real-time monitoring, telemetry tracking, and environmental automation.
- Programmed smart watering triggers by processing multi-sensor environmental data inputs securely.

EDUCATION

Bachelor of Technology in Computer Science

Galgotia College of Engineering & Technology, Noida

Aug 2019 – May 2023
