Professional Summary

Full Stack Software Developer with 2+ years of experience building scalable and high-performance web applications using React.js, Next.js, Node.js, and .NET. Proven ability to improve system performance, build enterprise dashboards, and deliver production-ready solutions. Strong expertise in REST APIs, authentication, and system optimization.

Technical Skills

Languages: JavaScript, C#, SQL, Python

Frontend: React.js, Next.js, Angular, HTML5, CSS3, Bootstrap

Backend: Node.js, .NET

Tools: Git, Docker, Postman, VS Code, Power BI

Concepts: REST APIs, JWT Authentication, RBAC, System Design, Performance Optimization

Professional Experience

Software Developer

May 2025 – Present

Dixon Technologies, Noida

- Developed and maintained master dashboards for Acer systems, enabling real-time monitoring and analytics.
- Designed and implemented scalable forms for daily operational data updates across Lenovo systems.
- Built secure and optimized REST APIs using .NET and SQL Server for enterprise-level applications.
- Improved system performance and data processing efficiency through backend optimization.
- Collaborated with cross-functional teams to deliver scalable and production-ready features.

Full Stack Developer

Nov 2023 – Nov 2024

Onremote Telecom, Noida

- Developed a responsive internal web platform for operational workflows and tracking.
- Built and deployed company website with modern UI using React.js and Bootstrap.
- Designed and integrated APIs with frontend applications ensuring smooth data flow.
- Improved UI performance and reduced bugs through structured debugging and optimization.

Web Developer

Jun 2023 – Nov 2023

UNOS, Noida

- Developed and deployed two responsive corporate websites with improved performance and accessibility.
- Ensured cross-browser compatibility and optimized loading speed.

Projects

Task Management Application

- Built a scalable full stack application using React.js, Node.js, and MySQL.
- Implemented secure authentication and role-based workflows.
- Optimized database queries for performance and scalability.

Remote Plant Monitoring System (IoT)

- Developed an IoT-based system for real-time monitoring and automation.
- Enabled smart watering using environmental sensor data.

AI Voice Assistant

- Built a Python-based voice assistant using speech recognition.
- Automated system-level tasks using voice commands.

Key Achievements

- Improved system performance and efficiency through backend optimization.
- Delivered scalable dashboards and enterprise applications supporting business operations.
- Reduced application bugs and improved stability through structured debugging.

Education

Bachelor of Technology in Computer Science
Galgotia College of Engineering & Technology, Noida
Aug 2019 – May 2023
